

Contents

Chapter 1	Introduction	01-28
	1.1 Chirality	02
	1.2 Introduction to Helical Structure	03
	1.3 Nomenclature and the basic types of helicenes	04-06
	1.4 Structural features of helicene	07
	1.5 Properties of helicenes	07-10
	1.6 Synthetic Approaches of helicenes	11-15
	1.7 Application of helicenes	15-18
	1.8 Aim of the thesis	19-20
	1.9 References	21-28
Chapter 2	Synthesis and study of aza[n]helicene based chiral amines	29-141
	2.1 Azahelicenes	29
	2.2 Approaches for incorporating N within the helical Scaffold	29-34
Chapter 2A	Synthesis and resolution of unsymmetrical 2-amino-5-aza[6]helicene	35-96
	2A.1 Chemistry of Amino-Substituted Helicenes: Literature Insight	36-43
	2A.2 Results and Discussion	44-57
	2A.2.1 Synthesis of 2-nitro-5-aza[6]helicene	44-45
	2A.2.2 Understanding regioselectivity of Photocyclization	46
	2A.2.3 X-ray structure analysis of 2-nitro-5-aza[6]helicene	47-48
	2A.2.4 Synthesis of 2-amino-5-aza[6]helicene	49
	2A.2.5 Resolution of 2-amino-5-aza[6]helicene	50-57
	2A.3 Conclusion	57
	2A.4 Experimental data	58-68
	2A.5 Spectral data	69-89
	2A.6 Crystallographic data	90-91

	2A.7 References	92-96
Chapter 2B	Accessing optically pure dimethylaza[7]helicene via hydrogenative deprotection of chiral helical diamines	97-141
	2B.1 Introduction	98-101
	2B.2 Results and Discussion	102-112
	2B.2.1 Synthesis of 5,13-diiformyl-aza[7]helicene	102-104
	2B.2.2 X-ray Structure Analysis of 5,13-diiformyl-aza[7]helicene	105-106
	2B.2.3 Synthesis of chiral helical diamines	107-109
	2B.2.4 Selective hydrogenation of helical diamines	110-112
	2B.3 Conclusion	112
	2B.4 Experimental data	113-122
	2B.5 Spectral data	123-136
	2B.6 Crystallographic data	137
	2B.7 References	138-141
Chapter 3	Synthesis and study of symmetrical dicyano derivative of oxa[7]helicene	142-188
	3.1 Introduction to Oxahelices	142-147
	3.2 Cyano helices and spontaneous resolution	147-149
	3.3 Results and Discussion	149-160
	3.3.1 Results and DiscussionSynthesis of 6,12-dicyano-oxa[7]helicene	149-152
	3.3.2 Effect of change in the position of cyano groups	152-153
	3.3.3 X-ray Structure Analysis	153-156
	3.3.4 Photophysical properties	156-158
	3.3.5 Computational analysis	159-160
	3.3.6 Thermal properties	160
	3.4 Conclusion	160-161
	3.5 Experimental data	162-166
	3.6 Spectral data	167-180

	3.7 Crystallographic data	181
	3.8 Computational data	182-184
	3.9 References	185-188
Chapter 4	Attempts to synthesize propeller-shaped triple helicenes	189-226
	4.1 Introduction to multiple [<i>n</i>]helicenes	189
	4.2 Chemistry of Triple helicenes: Literature insight	189-193
	4.3 Results and Discussion	193-203
	4.3.1 Attempted synthesis of triple aza[6]helicene	193-196
	4.3.2 Attempted synthesis of triple 1,3-dimethyl[4]helicene	197-201
	4.3.3 Attempt to synthesize propeller-shaped triple helical oxazine	201-203
	4.4 Conclusion	204
	4.5 Experimental data	205-213
	4.6 Spectral data	214-220
	4.7 Computational data	221-223
	4.8 References	224-226
	Conferences	227
	List of Publications	228
