

## LIST OF TABLES

|          |                                                                                       | Page No. |
|----------|---------------------------------------------------------------------------------------|----------|
| Table 1  | Information Sources-1                                                                 | 76       |
| Table 2  | Information Sources-2                                                                 | 77       |
| Table 3  | Median Values                                                                         | 187      |
| Table 4  | Data Validation                                                                       | 187      |
| Table 5  | Physicians' Mean Responses to belief constructs                                       | 189      |
| Table 6  | Statements comprising belief constructs                                               | 190      |
| Table 7  | Demographics of Prescribers                                                           | 193      |
| Table 8  | Demographics of Medical Representatives                                               | 199      |
| Table 9  | Prescribers' ranking of "Sources of information"                                      | 206      |
| Table 10 | Prescribers' ranking of Product attributes                                            | 207      |
| Table 11 | Prescribers' ranking of Brand Choice factors                                          | 209      |
| Table 12 | MRs' Ranking of brand choice factors                                                  | 216      |
| Table 13 | Comparative analysis: Brand choice factors                                            | 219      |
| Table 14 | Comparative analysis: The fate of promotional materials.                              | 220      |
| Table 15 | Comparative analysis: Coping with adverse feedback                                    | 221      |
| Table 16 | Comparative analysis: Internet connection                                             | 222      |
| Table 17 | Comparative analysis: Time spent on Internet                                          | 223      |
| Table 18 | Prescribers' impressions: Factor-Patient-Doctor relationship                          | 225      |
| Table 19 | Prescribers' impressions: Factor-Medical Representatives                              | 227      |
| Table 20 | Prescribers' impressions: Factor-Promotion                                            | 231      |
| Table 21 | Prescribers' impressions: Factor-Price & Miscellaneous                                | 233      |
| Table 22 | Prescribers' impressions: Alternative Methods                                         | 234      |
| Table 23 | MRs' impressions: Factor-Medical Representatives                                      | 245      |
| Table 24 | MRs' impressions: Factor- Promotion                                                   | 249      |
| Table 25 | MRs' impressions: Factor- Price                                                       | 250      |
| Table 26 | Comparative analysis: Prescribers' Opinion vs. MRs' impressions                       | 252      |
| Table 27 | Difference among physicians' belief: Gender bias                                      | 257      |
| Table 28 | Strength of association between physicians' belief and their practice characteristics | 264      |
| Table 29 | Difference between physicians' beliefs: Attachment to academic institutes             | 265      |
| Table 30 | Factor analysis: Patient-doctor relationship                                          | 271      |
| Table 31 | Factor analysis: Medical Representatives                                              | 272      |
| Table 32 | Factor analysis: Promotion & Product attributes                                       | 273      |
| Table 33 | Factor analysis: Alternative methods of promotion                                     | 274      |
| Table 34 | Factor analysis: Dependent variable                                                   | 275      |
| Table 35 | Regression analysis                                                                   | 284      |
| Table 36 | Ranking of Brand choice factors                                                       | 292      |
