

## LIST OF TABLES

	Page
1. Annual range and average temperature of air in °C.	41
2. Average seasonal values of atmospheric temperature.	45
3. Observed hours of bright sunshine.	47
4. Level of water.	50
5. Temperature of surface water. Station-A.	53
6. Maximum and Minimum temperature - Surface layer.	54
7. Seasonal variation in temperature of surface water.	55
8. Temperature of bottom layer of water.	59
9. Maximum and minimum temperature - bottom layer.	60
10. Seasonal variation in temperature of bottom layer of water.	62
11. Temperature of surface and bottom layers of water. Station B.	65
12. Maximum and minimum temperature (surface layer)	66
13. Seasonal variation in temperature (surface layer)	67.

	Page
14. Maximum and minimum temperature (Bottom layer)	69
15. Seasonal variation in temperature.	70
16. Surface and bottom temperature and their differences in early morning (Station A)	72
17. Surface and bottom temperature and their differences in afternoon. Station A.	73
18. Hydrogen concentration of water.	75
19. Hardness and chlorides in surface samples.	78
20. Oxygen content (mg/l) in surface sample (Station A).	82
21. Maximum and minimum values of oxygen in surface samples.	83
22. Seasonal variation in the oxygen content in surface sample.	84
23. Oxygen content in bottom layer of water.	85
24. Maximum and minimum values of oxygen in bottom samples.	86
25. Seasonal variation in oxygen content in bottom samples.	87
26. Surface and bottom values of oxygen and their differences in early morning.	

27.	Surface and bottom values of oxygen and their differences in afternoon.	89
28.	Percent saturation of oxygen in surface and bottom layers of water. Station A.	92
29.	Oxygen content in surface and bottom samples. Station B.	93
30.	Maximum and minimum values of oxygen (surface layer)	94
31.	Seasonal variation in oxygen in surface layer of water.	95
32.	Maximum and minimum values of oxygen in bottom layer of water.	96
33.	Seasonal variation in oxygen in bottom layer of water.	97
34.	Vertical distribution of oxygen in early morning.	98
35.	Vertical distribution of oxygen in afternoon.	99
36.	Percent saturation of oxygen in surface and bottom layers of water. Station B.	100
37.	Silica content (mg/l) in surface sample.	104
38.	Calcium, sodium and potassium in surface sample.	105
39.	Percent composition of Algal groups.	108

40.	Periodicity of phytoplankton organisms.	109
41.	Estimated total weights of the dominant higher aquatic plants.	113
42.	Periphyton biomass at surface.	115
43.	Periphyton biomass of 2.5 m depth.	116
44.	Production rates in morning, noon and afternoon at Station A.	118
45.	Gross Production, net production adjusted net production and respiration - Station A.	125
46.	Annual estimates of gross and net primary production - Station A.	128
47.	Photosynthetic efficiency in the reservoir - Station A.	129
48.	Gross production, net production, adjusted net production and respiration - Station B.	130
49.	Photosynthetic efficiency - Station B.	135
50.	Production values expressed in $C^{14}/m^2/day$ .	136
51.	Cumulative periphyton productivity.	137
52.	Changes in volume and area.	165
53.	Analysis of Surface sample.	169
