

LIST OF PLATES

	After Page No.
Plate 6.1 Photograph showing Quaternary deposits overlying basement rocks in the pediment zone (Loc. Vanoda).	44
Plate 6.2 Photograph showing dunal topography north of Banas in north Gujarat.	44
Plate 6.3 Photograph of the saline wasteland between Gulf of Cambay and the Rann of Kutch.	46
Plate 6.4 Photograph showing Quaternary deposits extending upto the coastline in Mahi estuary (Loc. Kavi).	46
Plate 6.5 Photographs of ravines in Sabarmati valley. (Loc. Sanpad).	47
Plate 6.6 Photomosaic showing Holocene terraces abutting against the ravine affected Pleistocene sediments at the confluence of Sabarmati and Hathmati river. The cliffy edge of the ravinal surface marks the palaeobank (Loc. Sanpad).	49
Plate 6.7 Photomosaic showing Holocene terraces abutting against the ravine affected Pleistocene sediments in lower Mahi valley. The cliffy edge of the ravinal surface marks the palaeobank (Loc. Sultanpura).	49
Plate 6.8 Photomosaic showing Holocene terraces abutting against the ravine affected Pleistocene sediments in lower Narmada valley. The cliffy edge of the ravinal surface marks the palaeobank (Loc. Sinor).	49
Plate 6.9 Photograph of an entrenched meander in Sabarmati river (Loc. Mahudi).	54
Plate 6.10 Photograph of an entrenched meander in Mahi river (Loc. Dabka).	54
Plate 6.11 Photograph of an entrenched meander in Narmada river (Loc. Bhimpura).	54
Plate 7.1 Photograph showing the nature of Pleistocene sediments exposed in Sabarmati valley (Loc. Oran).	60
Plate 7.2 Photograph showing the nature of Pleistocene sediments exposed in Mahi valley (Loc. Dabka).	60

Plate 7.3 Photograph showing the nature of Pleistocene sediments exposed in Narmada valley (Loc. Tilakwada).	60
Plate 7.4 Photograph showing gravelly deposits of lower Narmada alluvial fan (Loc. Tilakwada).	60
Plate 7.5 Photograph showing the nature of sediments in a fluvial Holocene terrace in Sabarmati (Loc. Sanpad).	67
Plate 7.6 Photograph showing the nature of sediments in a marine Holocene terrace in Mahi valley (Loc. Sultanpura).	67
Plate 7.7 Photograph showing the nature of sediments in a fluvial Holocene terrace in Orsang valley (Loc. Anklawadi).	67
Plate 7.8 Photograph showing intraformational folds in calcretised silty sands below gravel-II in Mahi valley (Loc. Khorwad).	67
Plate 7.9 Photograph showing intraformational folds in calcretised silty sands below gravel-II in Mahi valley (Loc. Rayka).	70
Plate 7.10 Photograph of a synsedimentary fault in Mahi valley. The fault dies out in the overlying horizons (Loc. Poicha).	70
Plate 7.11 Photograph showing slicken-sided surface in Mahi valley (Loc. Kadana).	71
Plate 7.12 Photograph showing slump structure in Mahi valley (Loc. Rayka).	71
Plate 7.13 Photograph showing slump structure in Narmada valley (Loc. Bhimpura).	72
Plate 7.14 Photograph showing forcibly injected liquefied sand resulting in the deformation of laminated fine silts marine Holocene terrace in Mahi valley (Loc. Kothiyakhad).	75
Plate 7.14A Tracing overlay of the above photograph. Note the thin layer of tidal clay filling up the microrelief produced due to deformation.	75
Plate 7.15 Photograph showing tight folding of the marine Holocene terrace sediments in Mahi valley (Loc. Mujpur).	75
Plate 7.15A Tracing overlay of the above photograph. Note the shear plane. (Legend same as in plate 7.14A)	75

Plate 7.16 Downward injected sand dyke in a fluvial Holocene terrace in Orsang valley. Note the deformation of the surrounding sediment layers and load structures (Loc. Anklawadi).	75
Plate 7.17 Downward penetrating sand dyke and the resulting buckling of adjacent sediment layers in Holocene terrace in Mahi valley (Loc. Kothiyakhad).	75
Plate 7.18 Photograph showing load structures formed due to seismic loading in a fluvial Holocene terrace in Orsang valley (Loc. Anklawadi).	76
Plate 7.19 Photograph showing tight convolutions in marine Holocene sediments in Mahi valley. Note the undeformed overlying and underlying horizons (Loc. Kothiyakhad).	76
Plate 7.19A Tracing overlay of the above photograph showing the deformation. (Legend same as in plate 7.14A)	76
Plate 7.20 Photograph showing randomly disseminated organic matter due to seismic shaking of oversaturated sediments in Mahi valley (Loc. Mujpur).	76
Plate 7.20A Tracing overlay of the above photograph showing synsedimentary microfault. (Legend same as in plate 7.14A)	76
