

ACKNOWLEDGMENTS

It is with great pleasure to note that the author acknowledges his deep sense of gratitude to Dr. A.M.Talati for suggesting the problem and for his valuable guidance throughout the course of this work, without which this work would not have seen the light of the day.

He also takes this opportunity to express his sense of gratefulness to Professor Suresh Sethna, Head of the Chemistry Department, for his encouragement and continued interest in the work.

His thanks are due to Dr. S.S.Lele microanalyst (at present Reader in Analytical Chemistry) for the micro-analysis of the samples.

His thanks are due to Professor Narsinhan, Chemistry Department, I.I.T., Kanpur for the infra-red spectra and Professor R.D.Patel, Chemistry Department, Sardar Patel University, Vallabh-Vidyanagar for providing facilities (to Mr. R.N.Kapadia) for thermal studies presented herein.

His thanks are also due to C.S.I.R.for awarding him a research fellowship to work on the research project "Semiconducting Polymers" and U.G.C.for the award of the research scholarship.

Finally the author thanks all the fellow workers and the members of the staff for their kind co-operation from time to time.

V. N. Mistry
