

List of Tables in the Thesis

Sr.No.	Table No.	Title	Pg.No.
1.	3.1	Calibration for Etoposide by UV spectrophotometric method.	93
2.	3.2	Calibration for Etoposide using HPLC method	94
3.	3.3	Calibration of Etoposide in Cell lysates	96
4.	3.4	Extraction Efficiency of Etoposide in cell lysates	97
5.	3.5	Calibration of DOC by UV Spectrophotometric method	99
6.	3.6	Calibration for DOC by HPLC method	100
7.	3.7	Calibration of DOC in Cell Lysates	102
8.	3.8	Extraction efficiency of DOC in cell lysates (n=3)	103
9.	3.9	Calibration of protein by BCA Protein Assay method	105
10.	4.1	Coded values for formulation parameters for preparation of Etoposide liposomes (ETPLIP)	122
11.	4.2	Coded values for formulation parameters for preparation of Docetaxel (DOCLIP) liposomes	123
12	4.3	2 ³ Full Factorial Design for Etoposide Liposomes (ETPLIP)	124
13	4.4	2 ³ Full Factorial Design for Docetaxel Liposomes (DOCLIP)	125
14.	4.5	Model coefficients estimated by Multiple Linear Regression for ETPLIP.	126
15	4.6	Model coefficients estimated by Multiple Linear Regression for DOCLIP	127

16	4.7	Observed Responses and Theoretically predicted Responses for ETPLIP.	128
17	4.8	Observed Responses and Theoretically predicted Responses for DOCLIP	129
18	4.9	ANOVA (Analysis of Variance) of Second Order Polynomial equation for ETPLIP.	130
19	4.10	ANOVA (Analysis of Variance) of Second Order Polynomial equation for DOCLIP	131
20	4.11	Checkpoint Analysis for Etoposide liposomes (ETPLIP)	134
21	4.12	Checkpoint Analysis for Docetaxel liposomes (DOCLIP)	135
22	4.13	Particle size, Zeta Potential and PDE of optimized ETP and DOC Liposomal Formulations	137
23	4.14	Particle Size and Zeta potential of 6-coumarin loaded liposomes	137
24	5.1	Summary report of effect of concentration of coupling agent (EDC) on HA grafting efficiency, particle size and zeta potential for HA grafted Etoposide loaded liposomes. (HAETPLIP)	156
25	5.2	Summary report of effect of concentration of coupling agent (EDC) on HA grafting efficiency, particle size and zeta potential for HA grafted Docetaxel loaded liposomes. (HADOCLIP)	158

26	5.3	Summary report of characterization of Non grafted and HA grafted liposomal Etoposide and Docetaxel.	160
27	6.1	Characterization of Etoposide loaded liposomes (ETPLIP), Hyaluronic acid (HA) grafted Etoposide Liposomes (HAETPLIP) and Docetaxel loaded liposomes (DOCLIP) and HA grafted Docetaxel liposomes (HADOCLIP) in terms of particle size, zeta potential and PDE.	181
28	6.2	Characterization of 6-coumarin loaded non grafted and HA grafted liposomes in terms of particle size, zeta potential and surface density of HA.	181
29	6.3	<i>In vitro</i> drug release profile of Etoposide Drug Solution (ETPSOL),non grafted Etoposide liposomes (ETPLIP) and HA grafted Etoposide liposomes (HAETPLIP) in Phosphate Buffer Saline (pH=7.4)	188
30	6.4	<i>In vitro</i> drug release profile of Docetaxel Drug Solution (DOCSOL),non grafted Docetaxel liposomes (DOCLIP) and HA grafted Docetaxel liposomes (HADOCLIP) in Phosphate Buffer Saline (pH=7.4)	190
31	7.1	Compositions and abbreviations for different lyophilized liposomal formulations of ETP	205
32	7.2	Influence of different cryoprotectants on freeze dried Liposomal DPI of Etoposide	205
33	7.3	Compositions and abbreviations for different lyophilized liposomal formulations of DOC	207

34	7.4	Influence of different cryoprotectants on freeze dried Liposomal DPI of DOC	207
35	7.5	Solid State Characterization and Residual Water Content of Lyophilized Formulations (HA grafted liposomal DPI of Etoposide)	209
36	7.6	Solid State Characterization and Residual Water Content of Lyophilized Formulations (HA grafted liposomal DPI of Docetaxel)	209
37	7.7	Summary report of in vitro drug deposition of HA grafted liposomal DPIs of Etoposide.	212
38	7.8	Summary report of in vitro drug deposition of HA grafted liposomal DPIs of Docetaxel.	213
39	7.9	In vitro drug release profile of plain Etoposide and developed HA grafted liposomal DPIs of Etoposide with different carriers.	216
40	7.10	In vitro drug release profile of plain Docetaxel and developed HA grafted Docetaxel liposomal DPIs with different carriers.	218
41	8.1	Stability data of batch HA grafted ETP liposomal DPI formulation (LEDPIM)	230
42	8.2	Stability data of batch HA grafted DOC liposomal DPI formulation (LDDPIM)	235
43	9.1	Cellular Pharmacokinetic parameters following administration	262

		of Etoposide Drug solution (ETPSOL), Etoposide Liposomes (ETPLIP) and HA grafted Etoposide liposomes (HAETPLIP)	
44	9.2	Cellular Pharmacokinetic parameters following administration of Docetaxel Drug solution (DOCSOL), Docetaxel Liposomes (DOCLIP) and HA grafted Docetaxel liposomes (HADOCLIP)	263
45	9.3	Cell Cycle Analysis of Etoposide in A549 cell lines by Propidium Iodide staining using Flow Cytometry A549 cells were incubated with Etoposide Liposomes (ETPLIP) and HA grafted Etoposide liposomes (HAETPLIP).	266
46	9.4	Cell Cycle Analysis of Docetaxel in A549 cell lines by Propidium Iodide Staining using Flow Cytometry A549 cells were incubated with Docetaxel Liposomes (DOCLIP) and HA grafted Docetaxel liposomes (HADOCLIP)	266
