

TABLE OF CONTENTS

Chapter No.			Particulars	Page No.
			Certificate of Guide	i
			Declaration by Candidate	ii
			Acknowledgements	iii
			Research Publications	iv
1			Introduction	1
	1.1		Statistics as a Science of Inductive Inference	2
	1.2		Bayesian Inference	5
	1.3		Various types of Loss Functions	8
	1.4		Asymmetric Loss Functions	10
	1.5		Bayesian Point Estimation	12
	1.6		Review of Literature	17
	1.7		An Outline of Problems under Investigation	19
2			One Sample Shrinkage Testimators Under Asymmetric Loss Function	23
	2.1		Introduction	23
		2.1.1	Exponential Distribution	23
		2.1.2	Normal Distribution	24
	2.2		Shrinkage Testimators for Scale Parameter of an Exponential Distribution	28
	2.3		Risk of Testimators	30
		2.3.1	Risk of $\hat{\theta}_{ST_1}$	31

		2.3.2	Risk of $\hat{\theta}_{ST_2}$	32
		2.3.3	Risk of $\hat{\theta}_{ST_3}$	33
		2.3.4	Risk of $\hat{\theta}_{ST_4}$	35
	2.4		Relative Risks of $\hat{\theta}_{ST_i}$	36
	2.5		Recommendations for $\hat{\theta}_{ST_i}$	38
		2.5.1	Recommendations for $\hat{\theta}_{ST_1}$	38
		2.5.2	Recommendations for $\hat{\theta}_{ST_2}$	39
		2.5.3	Recommendations for $\hat{\theta}_{ST_3}$	40
		2.5.4	Recommendations for $\hat{\theta}_{ST_4}$	41
			Conclusions	42
	2.6		Shrinkage Testimator for the variance of a Normal Distribution	46
	2.7		Risk of Testimators	47
		2.7.1	Risk of $\hat{\sigma}^2_{ST_1}$	47
		2.7.2	Risk of $\hat{\sigma}^2_{ST_2}$	49
	2.8		Relative Risk of $\hat{\sigma}^2_{ST_i}$	51
	2.9		Recommendations for $\hat{\sigma}^2_{ST_i}$	52
		2.9.1	Recommendations for $\hat{\sigma}^2_{ST_1}$	52
		2.9.2	Recommendations for $\hat{\sigma}^2_{ST_2}$	53
			Conclusion	54
3			Double Stage Shrinkage Testimations under Asymmetric Loss Function	57
	3.1		Introduction	57

	3.2		Shrinkage Testimators for Scale Parameter of an Exponential Distribution	60
	3.3		Risk of Testimators	61
		3.3.1	Risk of $\hat{\theta}_{DST_1}$	62
		3.3.2	Risk of $\hat{\theta}_{DST_2}$	63
		3.3.3	Risk of $\hat{\theta}_{DST_3}$	65
	3.4		Relative Risk of Risk of $\hat{\theta}_{DST_i}$	67
	3.5		Recommendations for $\hat{\theta}_{DST_i}$	70
		3.5.1	Recommendations for $\hat{\theta}_{DST_1}$	70
		3.5.2	Recommendations for $\hat{\theta}_{DST_2}$	71
		3.5.3	Recommendations for $\hat{\theta}_{DST_3}$	71
			Conclusion	72
	3.6		Shrinkage Testimator for the Variance of a Normal Distribution	75
	3.7		Risk of Testimators	76
		3.7.1	Risk of $\hat{\sigma}^2_{DST_1}$	76
		3.7.2	Risk of $\hat{\sigma}^2_{DST_2}$	79
	3.8		Relative Risk of $\hat{\sigma}^2_{DST_i}$	81
	3.9		Recommendations for $\hat{\sigma}^2_{DST_i}$	82
		3.9.1	Recommendations for $\hat{\sigma}^2_{DST_1}$	83
		3.9.2	Recommendations for $\hat{\sigma}^2_{DST_2}$	85
			Conclusions	86
4			Single Sample Shrinkage Testimators under General Entropy Loss Function	89

	4.1		Introduction	89
		4.1.1	General Entropy Loss Function	90
		4.1.2	Incorporating a Point Guess and $\hat{\theta}_{ST}$	91
	4.2		Shrinkage Testimators for Scale Parameter of an Exponential Distribution	92
	4.3		Risk of Testimators	93
		4.3.1	Risk of $\hat{\theta}_{ST_1}$	93
		4.3.2	Risk of $\hat{\theta}_{ST_1}$	94
	4.4		Relative Risk of $\hat{\theta}_{ST_i}$	96
	4.5		Recommendations for $\hat{\theta}_{ST_i}$ and Conclusion	97
	4.6		Shrinkage Testimator for the Variance of a Normal Distribution	101
	4.7		Risk of Testimators	103
		4.7.1	Risk of $\hat{\sigma}^2_{ST1}$	103
		4.7.2	Risk of $\hat{\sigma}^2_{ST2}$	104
	4.8		Relative Risk of $\hat{\sigma}^2_{STi}$	106
	4.9		Recommendations for $\hat{\sigma}^2_{STi}$	107
		4.9.1	Recommendations for $\hat{\sigma}^2_{ST1}$	107
		4.9.2	Recommendations for $\hat{\sigma}^2_{ST2}$	109
			Conclusion	110
5			Double Stage Shrinkage Testimators under General Entropy Loss Function	113
	5.1		Introduction	113
	5.2		Shrinkage Testimators for Scale Parameter of an	115

			Exponential Distribution	
	5.3		Risk of Testimators	116
		5.3.1	Risk of $\hat{\theta}_{DST_1}$	116
		5.3.2	Risk of $\hat{\theta}_{DST_2}$	118
	5.4		Relative Risk of $\hat{\theta}_{DST_i}$	120
	5.5		Recommendations for $\hat{\theta}_{DST_i}$	121
			Conclusions	123
	5.6		Shrinkage Testimator for the Variance of a Normal Distribution	126
	5.7		Risk of Testimators	127
		5.7.1	Risk of $\hat{\sigma}^2_{DST1}$	127
		5.7.2	Risk of $\hat{\sigma}^2_{DST2}$	129
	5.8		Relative Risk of $\hat{\sigma}^2_{DSTi}$	131
	5.9		Recommendations for $\hat{\sigma}^2_{DSTi}$	133
		5.9.1	Recommendations for $\hat{\sigma}^2_{DST1}$	133
		5.9.2	Recommendation for $\hat{\sigma}^2_{DST2}$	134
			Conclusions	135
6			Shrinkage Testimation in Weibull Distribution	138
	6.1		Introduction	138
	6.2		Shrinkage Testimator using Point Guess	140
	6.3		Risk of Testimators	142
		6.3.1	Risk of $\hat{\beta}_{ST_1}$	142
		6.3.2	Risk of $\hat{\beta}_{ST_2}$	144
	6.4		Relative Risk of $\hat{\beta}_{ST_i}$	146

	6.5		Recommendations for $\hat{\beta}_{ST_i}$	147
		6.5.1	Recommendations for $\hat{\beta}_{ST_1}$	147
		6.5.2	Recommendations for $\hat{\beta}_{ST_2}$	148
			Conclusions	149
	6.6		Shrinkage Testimator of β by Shrinkage towards an Interval	152
	6.7		Risk of Testimators	153
	6.8		Relative Risk of $\hat{\beta}_{ST_3}$	154
	6.9		Recommendations for of $\hat{\beta}_{ST_3}$	155
			Conclusion	156
