Synopsis	3
Part I	
Introduction - Current status of the subject	11
Part II	
Mechanisms underlying increase in rat liver RNA synthesis following whole-body x-irradiation	36
Section 1 : Changes elicited by whole-body radiation exposure in the components of transcription machinery of the rat liver	40
Section 2 : Radiation-induced changes in structure and turnovers of chromatin constituents in the rat liver	79
Section 3 : Abscopal mechanisms underlying radiation- induced activation in the transcription machinery of the rat liver	114
Part III	
Transcriptional changes in the regenerating rat liver	127
Publication	160
