

LIST OF FIGURES

FIGURE

- 2.1 I.R. spectrum of PBR
- 2.2 I.R. spectrum of EPBR (E_5)
- 2.3 FTIR spectrum of (a) PBR (b) EPBR (c) chlorohydrin derivative of PBR.
- 2.4 I.R. spectrum of chlorohydrin derivative of PBR.
- 2.5 ^1H NMR spectra of (a) PBR (b) EPBR (20 mol%)
- 2.6 ^1H NMR spectra of chlorohydrin derivative of PBR.
- 2.7 ^{13}C NMR spectra of (a) PBR (b) EPBR (20 mol%)
- 2.8 ^{13}C NMR spectra of EPBR with different epoxy content
- 2.9 ^{13}C NMR spectrum of chlorohydrin derivative of PBR.
- 2.10 TGA of PBR and EPBR (E_1 - E_5)
- 2.11 DSC Thermograms of EPBR (E_3 , E_4 and E_5) and plot of T_g versus epoxy content.
- 2.12 DSC thermogram of chlorohydrin derivative of PBR
- 2.13 Plot of contact Angle (θ) versus epoxy content
- 2.14 Plots of η_{sp}/c versus concn. and $\ln \eta_r/c$ versus concn. for PBR

- and EPBR (E_1 - E_5).
- 2.15 Plot of intrinsic viscosity versus epoxidation level (mol%) of PBR and EPBR samples.
 - 3.1 Density changes of PVC/PBR blends.
 - 3.2 Density changes of PVC/EPBR, (b_1 - b_5) blends.
 - 3.3 Density changes of PVC/EPBR, (c_1 - c_4) blends.
 - 3.4 Density changes of PVC/chlorohydrin (d_1 - d_4) blends.
 - 3.5 Mixing torque-time curves of PVC and its blends with PBR in different concentrations.
 - 3.6 Mixing torque time curves of PVC/EPBR (b_1 - b_5) blends.
 - 3.7 Mixing torque time curves of PVC and its blends with EPBR in different concentrations.
 - 3.8 Mixing torque time curves of PVC and its varying compositions of PVC/chlorohydrin blends
 - 3.9 Variation of torque maximum (5 min) and torque regime (8 min) of PVC and its blends with different concentrations of various modifiers.
 - 3.10a Variations of Ta/s values of PVC and its blends with different concentrations of PBR.
 - 3.10b Variations of Ta/s values of PVC and its blends with EPBR of different epoxidation level.
 - 3.11a Variation of Ta/s values of PVC and its blends with different concentrations of EPBR (25 mol%).
 - 3.11b Variation of Ta/s values of PVC and its different concentrations of chlorohydrin.
 - 3.12 Experimental set up for thermal stability measurements of PVC blends by HCl evolution technique
 - 3.13 Variation of pH in the dissolving medium with degradation time for PVC and its blends.
 - 3.14 TGA thermograms of PVC and its blends with different

modifiers.

- 3.15 TGA thermograms of PVC and its blends with different concentrations of EPBR (25 mol%).
- 3.16 Broido analysis for PVC and its blends with different modifiers.
- 3.17 FTIR scan of PVC (P)
- 3.18 FTIR scan of PVC/PBR (90/10) blend (a_3)
- 3.19 FTIR scan of PVC/EPBR (90/10) blend (c_3)
- 3.20 FTIR scan of PVC/chlorohydrin (90/10) blend (d_3).
- 3.21 SEM micrographs of the Izod impact fractured surface of PVC(P) and its blends a_3 , c_3 , d_3 (X 1650).
- 3.22 SEM micrographs of the Izod impact fractured surface of PVC(P) and its blends a_3 , c_3 , d_3 (X 3300).
- 3.23 SEM micrographs of the Izod impact fractured surface of PVC blends c_1 , c_2 , c_4 (X 1650).
- 3.24 SEM micrographs of the Izod impact fractured surface of PVC blends c_1 , c_2 , c_4 (X 3300).
- 3.25 X-ray diffraction pattern of PVC and its blends.
- 3.26 Influence of different modifiers and their concentrations on tensile strength of PVC and its blends.
- 3.27 Influence of different modifiers and their concentrations on tensile modulus of PVC and its blends.
- 3.28 Influence of epoxidation level of EPBR on tensile strength of PVC blends.
- 3.29 Influence of epoxidation level of EPBR on tensile modulus of PVC blends.
- 3.30 Influence of various modifiers of different concentrations on the flexural strength of PVC and its blends.
- 3.31 Influence of different modifiers and their concentrations on

- flexural modulus of PVC and its blends.
- 3.32 Influence of epoxidation level of EPBR on the flexural strength of PVC blends.
 - 3.33 Influence of epoxidation level of EPBR on flexural modulus of PVC blends.
 - 3.34 Influence of different modifiers and their concentrations on Izod impact strength of PVC and its blends.
 - 3.35 Influence of epoxidation level of EPBR on Izod impact strength of PVC blends.
 - 3.36 Dynamic mechanical behaviour ($\tan \delta$ curves) of PVC and its blends with different modifiers.
 - 3.37 Dynamic mechanical behaviour ($\tan \delta$ curves) of PVC and PVC/EPBR blends.
 - 3.38 Influence of different modifiers and their concentrations on Heat Deflection Temperature of PVC and its blends.
 - 3.39 Influence of epoxidation level of EPBR on HDT of PVC blends.
 - 3.40 Influence of different modifiers and their concentrations on Rockwell Hardness of PVC and its blends.
 - 3.41 Influence of epoxidation level of EPBR on Rockwell Hardness of PVC blends.
