	Page No.
Declaration	i
Certificate	ii
Preface	iii
Acknowledgement	v
1. Introduction	1
1.1. Nuclear Reactions and their Classification	2
1.1.1. Nuclear Fusion	2
1.1.2. Break-up Reaction	3
1.1.3. Compound Nucleus Reaction	3
1.1.4. Direct Reactions	4
1.2. Nuclear Structure and Gamma Spectroscopy	6
1.2.1. Nuclei at High Spins	6
1.2.2. Methods of Populating Excited States	8
1.2.3. Heavy-Ion Fusion Evaporation Reactions	9
1.2.4. Production of High Spin States	11
1.2.4.1. Formation of Compound Nucleus	11
1.2.4.2. Decay of Compound Nucleus	12
1.3. Single Particle and Collective Motion	13
1.3.1. Single Particle Motion	14
1.3.2. Rotational Motion	15
1.4. Angular Momentum in Nuclei	16
1.5. The Coulomb Barrier	16
1.6. Magic Nuclei and Shell Closures	17
1.7. An Overview of Nuclear Structure	18
1.8. Motivation of Present Work	19
1.9. Difficult to Access Odd-Odd Nuclei near Proton Shell Closures ($Z \sim 20, 28$)	19
1.9.1. Spectroscopy of ^{36}Cl	19
1.9.2. Spectroscopy of ^{54}Mn	20

1.10. Yrast States Spectroscopy of Nuclei near Proton Shell Closure ($Z \sim 82$)	21
1.10.1. Spectroscopy of ^{195}Tl	21
References	23
2. Nuclear Properties and Theoretical Models	
2.1. Properties of Electromagnetic Radiation and Nucleus	25
2.1.1. Multipolarity of electromagnetic Radiation	25
2.1.1.1. Electric Quadrupole Moment	25
2.1.1.2. Magnetic Dipole Moment	26
2.1.2. Nuclear Shape Parameterization	27
2.1.3. Rotational Behaviour of a Nucleus – Rotational Band	28
2.1.3.1. Types of Rotational Bands	29
2.2. Theoretical Nuclear Models	33
2.2.1. The Spherical Shell Model	34
2.2.2. The Deformed Shell Model or Nilsson's model	37
2.2.3. Triaxial Nuclear Shapes	40
2.2.4. The Cranked Shell Model (CSM)	42
2.2.4.1. Nuclear Spin and Parity	43
2.2.4.2. Signature	44
2.2.5. Potential Energy Surface (PES) Calculations	45
2.2.6. Total Routhian Surface Calculations	45
References	47
3. Experimental Techniques - γ-ray spectroscopy with multi detector arrays	
3.1. Introduction	48
3.2. Interaction of γ -Rays with Matter	48
3.2.1. Photoelectric Absorption	49
3.2.2. Compton Scattering	50
3.2.3. Pair Production	52
3.3. Detection of γ -Rays	53
3.4. Fundamental Properties of γ Detector Arrays	54
3.4.1. Energy Resolution	55
3.4.2. Photopeak Efficiency and Peak-to-Total Ratio	56

3.4.3. Observational Limit	57
3.4.4. Detection Efficiency	58
3.4.5. Escape Suppression	58
3.4.6. Compton Suppression	59
3.5. γ -Ray Detectors – Composite Detectors	61
3.5.1. Clover Detector	62
3.5.1.1. Add-Back Mode of a Clover Detector	64
3.5.2. LEPS Detector	65
3.6. Detector Arrays for Nuclear Spectroscopy	65
3.7. Need for a Detector Array	66
3.8. Instrumentation for Large γ -Arrays	67
3.9. Resolving power of an Array	69
3.10. Data Acquisition and Analysis of Data from Multi-Detector Arrays	69
3.11. INGA (Indian National Gamma Array)	70
3.11.1. Electronics for the INGA Array	71
3.11.1.1. Electronics for Compton Suppression	72
3.11.1.2. Generation of Master Gate	74
3.11.1.3. Data Collection	75
3.12. AFRODITE (AFRican Omnipurpose Detector for Innovative Techniques and Experiments) Array	75
3.12.1. An Overview of the Electronics used	77
3.12.1.1. Energy Circuit	78
3.12.1.2. Timing Circuit	80
References	81
4. Analysis Methods	
4.1. Introduction	82
4.2. Pre-Sorting of Raw Data	82
4.3. Energy Calibration and Gain Matching	83
4.4. Doppler Shift Correction	85
4.5. Analysis of Singles Data	85
4.6. Analysis of Coincidence Data	86

4.7. Assignment of Spin and Parity	87
4.7.1. Directional Correlation from Oriented States (DCO)	89
4.7.2. Linear Polarization Measurements	90
4.7.3. Clover Detector as a Polarimeter	91
4.7.4. Polarization Matrix	92
References	94
5. Spectroscopy of Nuclei around Proton Shell Closures: Structure of ^{36}Cl and ^{54}Mn	
5.1. Introduction	95
5.2. Literature Survey	95
5.2.1. Spectroscopy of Odd-Odd Nucleus ^{36}Cl	95
5.2.2. Spectroscopy of Odd-Odd Nucleus ^{54}Mn	96
5.3. Aim of the present work	99
5.4. Experimental Details	99
5.5. Results and Discussions	100
5.5.1. Level Structure of ^{36}Cl	100
5.5.2. Level Structure of ^{54}Mn	108
5.6. Shell Model Calculations	122
5.7. Conclusion	126
References	127
6. Spectroscopy of the Nucleus around Proton Shell Closure $Z \sim 82$: Structure of ^{195}Tl	
6.1. Introduction	129
6.2. Literature Survey	130
6.3. Experimental Details	131
6.4. Results and Discussion	133
6.5. Conclusions	145
References	146
7. Summary and Conclusions	148
