

ACKNOWLEDGEMENTS

The author is highly grateful and indebted to Prof. S.S. Merh under whose guidance and supervision this investigation was carried out. But for his all round encouragement, inspiration and assistance, the author would not have been able to complete this study. The author is also thankful to his colleague, Shri B.B. Jambusaria for assisting him in many ways in the course of his field and laboratory investigations. He is also equally thankful to Shri P.P. Patel, R.K. Parmar and B.M. Chauhan for the help given to him while preparing the thesis.

Lastly the author wishes to thank Shri V.F. Bhavsar who very kindly agreed to type the thesis and made an excellent job of it.
