## 1. INTRODUCTION

1.1	General	1
1.2	Disaster Vulnerability	2
1.3	Disaster Mitigation and Prevention	4
1.4	Structural Aspects of Disasters Management	5
1.5	Scope and Objectives of Present Work	7
1.6	Organization of Thesis	9

## 2. LITERATURE REVIEW

2.1	Introduction	12
2.2	Pushover Analysis	13
2.3	Damage and Retrofitting for Earthquakes	17
2.4	Virtual Reality in Structural Engineering	19
2.5	Structural Aspects of Wind Storms	22
2.6	Mitigation Aspects for Wind Storms	25
2.7	Fire Loads on Structures	27
2.8	Damage and Repair for Fire	33
2.9	Structural Aspects of Flood Control	36
2.10	Structural Aspects of Blasts Loads	38
2.11	Aspects of Tsunami	39

## 3. VC++, VIRTUAL REALITY AND 3DS MAX ENVIRONMENT

3.1	Introduction	41
3.2	Visual C++ Programming Environment	41
3.3	Visual C++ Components	42
3.4	Overview of Virtual Reality	46
3.5	Applications of VR in Civil Engineering	53
3.6	3DStudio Max	57

3.7	Implementation of Applications in 3DS Max	58
3.8	Alternate Options of 3DStudio Max	60
3.9	VRML for Web Implementation	61
3.10.	Interactivity in a Virtual World	63
3.11	VRML Helper Objects in 3DS Max	63
3.12	Exporting 3D Scenes from 3DS Max to VRML	64
3.13	Visualising VRML File on COSMO Player	65
3.14	Interfacing of VC++, 3DS Max and VR	66

#### **4. SOFTWARE FOR EARTHQUAKE ANALYSIS**

4.1	General	67
4.2	Methods of Analysis for Earthquake Forces	68
4.3	Response Spectrum Method	70
4.4	Performance Based Analysis	73
4.5	Pushover Analysis	75
4.6	Computer Implementation	88
4.7	Steps for Using Package SA-DVR	93
4.8	Plane Frame Example	98
4.9	Verification of Results	125
4.10	Limitations of Pushover Analysis	129
4.11	Closing Remarks	130

#### **5. SOFTWARE FOR DAMAGE AND RETROFITTING**

5.1	General	131
5.2	Evaluation of Damage due to Earthquakes	132
5.3	Building Deficiencies	143
5.4	Seismic Retrofit Strategies	144
5.5	Computer Implementation for Retrofitting	149
5.6	Implementation in Virtual Reality	160
5.7	IS:456 (2000 ) and IS:13920 (1993) Detailing Criteria	164
5.8	Damage of Elements in the Virtual World	167
5.9	Local Retrofitting Options in Virtual Reality	177
5.10	Closing Remarks	185

## **6. SOFTWARE FOR ANALYSIS FOR CYCLONE FORCES**

6.1	General	187
6.2	Cyclone forces	187
6.3	Effect on Slender Buildings	190
6.4	Gust Factor Method by IS:875 (1987)	191
6.5	Computer Implementation of GFM	193
6.6	Dynamic Response Factor Method	198
6.7	Computer Implementation of DRFM	205
6.8	Comparison of Results of GFM and DRFM	213
6.9	Closing Remarks	216

## **7. SOFTWARE FOR WIND ON SLENDER BUILDINGS**

7.1	Introduction	217
7.2	Retrofitting and Mitigation Measures	217
7.3	Structural Systems For Wind Resistance	219
7.4	Computer Program For Wind Loads	226
7.5	Steps For Analysis of Slender Buildings	231
7.6	Structural Systems For Static Method	232
7.7	Structural Systems For Dynamic Methods	239
7.8	Comparison of Results	248
7.9	Virtual Reality Module	253
7.10	Closure	258

## **8. MITIGATION ASPECTS OF FIRE LOADS**

8.1	Introduction	259
8.2	Compartment Fires	259
8.3	Performance Based Fire Analysis	267
8.4	Effect of Fire on RCC Elements	269
8.5	Computer Implementation Using SAP2000	271
8.6	Fire Safe Designs: Mitigation Aspects	294
8.7	Fire Resistance Rating	294
8.8	Design of Fire Walls	296
8.9	Fire Safety Aspects Given in Indian Codes	298
8.10	Retrofitting of Structures Damaged by Fire	299
8.11	Closure	301

## **9. STRUCTURAL ASPECTS OF FLOOD CONTROL**

9.1	Introduction	302
9.2	Structural Measures for Flood Management	303
9.4	Flood Control on River Sabarmati	305
9.6	Flood Control on River Tapi	315
9.13	Closure	316

## **10.STRUCTURAL ASPECTS OF BLASTS AND TSUNAMI**

10.1	General	318
10.2	Explosion and Blast Phenomena	318
10.3	General Principles of Blast Loading	320
10.4	Response of Structural Elements to Blasts	321
10.5	Failure Modes of Blast Loaded Structures	322
10.6	Software For Blast Effects	323
10.7	Progressive Collapse Analysis- Case Study	323
10.8	WTC-FEMA Executive Summary	326
10.9	Tsunami Effects and Rehabilitation	327
10.10	Special Structural Measures for Tsunami	332
10.11	Conclusions	333

## **11.CONCLUSIONS AND CONTRIBUTION**

11.1	Summary	334
11.2	Conclusions	335
11.3	Contribution	341
11.4	Future Scope	344
