

TABLE OF CONTENTS

SYNOPSIS	iii
ACKNOWLEDGEMENTS	vii
LIST OF TABLES	ix
LIST OF FIGURES	x
LIST OF PLATES	xiii
CHAPTER - 1 INTRODUCTION	1
1.1 General	1
1.2 Object and Scope	3
1.3 Notation	5
CHAPTER - 2 REVIEW OF LITERATURE	7
2.1 Introduction	7
2.2 Theoretical Investigations	7
2.3 Photoelastic Test	9
2.4 Investigation by Models	10
2.5 Experimental Investigations	13
2.6 Fibre Reinforced Concrete	23
2.7 R.C.C. Deep Beam Design	35
(Current Practice of Deep Beam Design)	38

CHAPTER - 3	EXPERIMENTAL PROGRAMME	47
3.1	General	47
3.2	Description of Test Specimens	47
3.3	Notation of Beams	48
3.4	Materials	49
3.5	Concrete Mix	51
3.6	Form Work	52
3.7	Strain Gauge Applications	52
3.8	Mixing	52
3.9	Casting and Curing	53
3.10	Instrumentation and Testing Procedure	54
3.11	Deflection	54
3.12	Strain Indicating Bridge	55
3.13	Concrete Strain	55
3.14	Crack Measurements	55
3.15	Preparation of Specimens Prior to Testing	55
3.16	Control Specimens	56
3.17	Main Beams	56

CHAPTER - 4	RESULTS OF BEAM TESTS	68
4.1	General	68
4.2	Modes of Failure	68
(a)	Crack patterns	68
(b)	Flexural failure	71
(c)	Shear failure	71
(d)	Flexural shear failure	72
(e)	Bearing failure	72
(f)	Load-deflection characteristics	72
(g)	Steel strain	72
(h)	Inclined cracking load	73
(i)	Reserve strength beyond diagonal cracking	74
(j)	Ultimate load	75
CHAPTER - 5	ANALYTICAL FORMULATION	104
5.1	General	104
5.2	Behaviour in Compression	104
5.3	Behaviour in Splitting Tensile Strength	105
5.4	Behaviour in Flexure	105
5.5	Behaviour in Direct Tension	106

5.6	Derivation of Moment Capacity Enhancement Factor	106
5.7	Possible modes of Failure	107
5.8	Derivation for Flexural Formulae	108
(a)	For lower half depth fibrous concrete section	112
(b)	For full depth fibrous concrete section	115
(c)	For without fibre condition	117
5.9	Derivation of Shear Strength Formulae	120
5.10	Computation of Maximum Crack width Formula	126
CHAPTER - 6	DISCUSSION OF RESULTS	145
6.1	General	145
6.2	* Fully and Partially Steel Fibre Reinforced Concrete Member in Flexure and Shear	146
	* Role of Steel Fibres in Conventionally Reinforced Concrete Beams	
	* Stress-strain Curves of Plain and Fibrous Concrete in Flexure and Compression	
	* Stress-strain of Curves of Plain and Fibrous Concrete in Direct Tension	
	* Determination of the Values of Parameters and Coefficients	

*	Deformational Characteristic	
*	Computation of Ultimate Load Capacity	
CHAPTER - 7	SUMMARY AND CONCLUSIONS	163
7.1	Summary	163
7.2	Conclusions	163
7.3	Design Recommendations for Deep Beams	171
7.4	Recommendations for Future Research	173
BIBLIOGRAPHY		175
APPENDICES		
A	Notation	197
B	Stresses in Elliptical Section	201
C	Tables for Deflection in Beams	208
D	Tables for Strains in Web	218
E	Design Example	227
F	Papers Published / to be Published	236
