

## List of Tables

Title	Page No.
<b>Chapter 1</b>	
Table 3.1: Mesozoic and Cenozoic rock succession in Kachchh region (based on Merh, 1995)	25
Table 3.2 Rock classification and important fossils from individual formations (after Krishnan, 1968)	27
Table 3.3 Lithostratigraphy of Kachchh Mainland	28
Table 3.4: Table showing the Quaternary stratigraphy of Kachchh region (based on Merh, 1995)	31
<b>Chapter 5</b>	
Table 5.1. Terracing sequence of Central Kachchh Mainland, note the more number of terraces within the Katrol Hill Zone indicating the highest amount of tectonic instability within this zone as compared to the north and south of it.	120
Table 5.2a Morphometric data for different streams flowing north of Katrol Hill Fault	132
Table 5.2b Morphometric data for different streams flowing south of Katrol Hill Fault	132
Table 5.3 Morphometric data showing different parameters calculated	143
Table 5.4a Table showing different morphometric parameters calculated for the individual mountain fronts	149
Table 5.4b: Mountain front characteristics of Kachchh Mainland Front	152
Table 5.4c: Mountain front characteristics of Katrol Hill Zone	154
<b>Chapter 6</b>	
Table 6.1 Summary of the deformational structures observed in Great Rann-Banni region	178
Table 6.2: Active faults of study area and Kachchh region	204
Table 6.3: List of recent and historical earthquakes in Kachchh region	210
Table 6.4: Four seismo-active zones of Kachchh region	214
Table 6.5 Table showing the earthquake distribution from 1956 to 1996. A dataset taken for the present analyses	219
Table 6.6 Table showing the results of the calculations for the different earthquake magnitudes	220
Table 6.7a Table showing the calculated probabilities for the earthquake series with a Magnitude > 3	222
Table 6.7b Table showing the calculated probabilities for the earthquake series with a Magnitude > 4	222
Table 6.7c Table showing the calculated probabilities for the earthquake series with a Magnitude > 5	222
<b>Chapter 7</b>	
Table 7.1 Major deformational events of CKM	225
