

LIST OF TABLES

Table	Title	Page
5.1	Data bank for wetted surface area (a_w).	66
5.2	Data bank for effective interfacial area during physical absorption (a_p).	69
5.3	Data bank for effective interfacial area during chemical absorption (a_c).	72
5.4	Data bank for volumetric liquid side mass transfer coefficient ($k_L a$).	77
5.5	Data bank for gas side mass transfer coefficient during physical absorption .	
5.5 A	Case - I Overall gas side mass transfer coefficient ($K_G a$).	83
5.5 B	Case - II Volumetric gas side mass transfer coefficient ($k_G a$).	88
5.5 C	Case - III Volumetric gas side mass transfer coefficient during vaporization ($k_G a$).	90
5.5 D	Case - IV HTU data for vaporization.	92
5.6	Data bank for true liquid side mass transfer coefficient (k_L) obtained by Danckwerts model.	93
5.7	Data bank - (I) for overall gas side mass transfer coefficient during chemical absorption.	95
5.8	Data bank - (II) for overall gas side mass transfer coefficient during chemical absorption: Very low concentration of reactive species.	100

7.1.1	Results inclusive of processing parameters for wetted surface area (a_w).	123
7.1.2	Statistical analysis for different correlations of a_w .	126
7.1.3	Comparison between experimental values based on data bank and predicted values of a_w .	131
7.2.1	Results inclusive of processing parameters for effective interfacial area during physical absorption (a_p).	138
7.2.2	Statistical analysis for different correlations of a_p .	140
7.2.3	Comparison between experimental values based on data bank and predicted values of a_p .	147
7.3.1	Results inclusive of processing parameters for effective interfacial area during chemical absorption (a_c).	155
7.3.2	Statistical analysis for different correlations of a_c .	159
7.3.3	Comparison between experimental values based on data bank and predicted values of a_c .	163
7.4.1	Observed values for static area during absorption (a_{st}) based on $(a_p/a_t)_{exp}$.	172
7.4.2	Results inclusive of processing parameters for a_{st} based on $(a_p/a_t)_{exp}$.	178

7.4.3	Statistical analysis for different correlations of a_{st} based on $(a_p/a_t)_{exp}$.	181
7.4.4	Results inclusive of processing parameters for a_{st} based on $(a_w/a_t)_{exp}$.	186
7.4.5	Statistical analysis for different correlations of a_{st} based on $(a_w/a_t)_{exp}$.	188
7.4.6	Comparison between observed and predicted values of a_{st} based on $(a_p/a_t)_{exp}$.	192
8.1.1	Results inclusive of processing parameters for volumetric liquid side mass transfer coefficient ($k_L a$).	206
8.1.2	Statistical analysis for different correlations of $k_L a$.	211
8.1.3	Comparison between experimental values based on data bank and predicted values of $k_L a$.	213
8.1.4	Comparison between the experimental values (literature) and the predicted values of $k_L a$ for system having high viscosity of absorption media.	223
8.2.1 A	Results for $k_L a$ inclusive of physical properties of liquids and processing parameters required for obtaining true gas side mass transfer coefficient (k_G).	227
8.2.1 B	Observed values of k_G obtained from $K_G a$ data bank inclusive of processing parameters.	231

8.2.1 C	Observed values of k_G obtained from $k_G a$ data bank inclusive of physical properties.	237
8.2.1 D	Observed values of k_G obtained from $k_G a$ vaporization data bank inclusive of physical properties.	239
8.2.1 E	Observed values of k_G obtained from HTU data bank inclusive of physical properties.	242
8.2.2	Results inclusive of processing parameters for k_G .	247
8.2.3	Statistical analysis for different correlations of k_G .	255
8.2.4	Comparison between observed values based on data bank and predicted values of k_G .	257
8.3.1	Results inclusive of processing parameters for true liquid side mass transfer coefficient (k_L).	269
8.3.2	Statistical analysis for different correlations of k_L .	278
8.3.3	Comparison between observed values based on data bank and predicted values of k_L .	280
8.4.1 A	Physical properties of liquids and gases required for obtaining volumetric liquid side mass transfer coefficients with chemical reaction ($k_L' a$) based on $K_G a$ data bank (I).	292

8.4.1 B	Observed values of $k_L a$ obtained from $K_G a$ data bank (H) for chemical absorption inclusive of processing parameters.	297
8.5.1 A	Physical properties of liquids and gases required for obtaining volumetric liquid side mass transfer coefficient with chemical reaction based on $K_G a$ data bank (II).	301
8.5.1 B	Observed values of $k_L' a$ obtained from $K_G a$ data bank (II) for chemical absorption inclusive of processing parameters.	302
8.4.2	Results inclusive of parameters for $k_L' a$ based on $K_G a$ data bank (I).	306
8.5.2	Results inclusive of processing parameters for $k_L' a$ based on $K_G a$ data bank (II) for very low concentration of reactive species.	311
8.6	Comparison between observed values based on data bank (II) and predicted values of $k_L a$ for two cases.	321
9.1	Data bank for HETP : Distillation in packed columns.	331
9.2	Predicted values of mass transfer coefficients inclusive of physical properties of liquids and vapours.	335
9.3	Results inclusive of processing parameters for HETP : Distillation in packed columns.	339
9.4	Comparison between experimental values based on data bank and predicted values of HETP.	342
