

Contents

CHAPTER-I

I.1	General Introduction to benzopyran-2H-one	01
I.2	General mechanism of photosensitisation	02
I.3	Effects of psoralens and angelicins as chemotherapeutic agents.	03
I.4	General spectral properties of 2H-1-benzopyran-2-ones	09
I.5	General approaches applied for synthesis of 2H-1-benzopyran-2-ones	12
I.6	References	14

CHAPTER-II

Synthesis of Monofunctional Aminopsoralens

II.1	Introduction	17
II.2	Strategies used for synthesis of fused furo-2H-1-benzopyran-2-ones	17
II.3	Results and discussion	27
II.4	Experimental	32
II.5	Conclusion	81
II.6	References	81

CHAPTER-III

Section-1 Synthesis of psora-Schiff bases

III.1	Introduction	83
III.2	Results and discussion	85
III.3	Experimental	89

Section-2 Synthesis of psora-azetidinones

III.4	Introduction	126
III.5	Results and discussion	127
III.6	Experimental	131
III.7	Conclusion	153
III.8	References	153

CHAPTER-IV

Section-1 Claisen rearrangement and Wittig reactions of Cinnamylated 2H-1-benzopyran-2-ones

IV.1	Introduction	156
IV.2	Results and discussion	161
IV.3	Experimental	166

Section-2 Knoevenagel and Claisen reactions of Allylated and Cinnamylated 2H-1-benzopyran-2-ones

IV.4	Introduction	185
IV.5	Results and discussion	188
IV.6	Experimental	190

**Section-3 Claisen rearrangement and Wittig reactions of Prenylated
2H-1-benzopyran-2-ones**

IV.7	Introduction	213
IV.8	Results and discussion	215
IV.9	Experimental	217

**Section-4 Synthesis of novel 2H-1-benzopyran-2-ones using 1-2-amino-
1-butanol**

IV.10	Introduction	242
IV.11	Results and discussion	243
IV.12	Experimental	246
IV.13	Conclusion	259
IV.14	References	259

CHAPTER-V

**Antibacterial Studies of Aminopsoralens, Psora-Schiff bases and Psora-
azetidinones**

V.1	Introduction	260
V.2	Evaluation of antibacterial activity	261
V.3	Results and discussion	263
V.4	Experimental	266
V.5	Conclusion	266
V.6	References	271
	Summary
