

# Table of Contents

Acknowledgement	i
Preface	iv
List of Figures	xi
List of Tables	xvi
<b>Chapter 1: Introduction</b>	<b>1</b>
1.1 Heavy Ion Nuclear Reaction Mechanism	2
1.2 Interesting features of Weakly Bound Nuclei and their Breakup Reactions	10
1.3 General Motivation for Study	14
1.3.1 Study of Elastic Scattering	14
1.3.2 Study of Inclusive Alpha Production	18
1.4 Objectives of Study	19
1.5 Scheme of Thesis	20
References	22
<b>Chapter 2: Experimental Methods and Theoretical Models</b>	<b>26</b>
2.1 Production and Acceleration of particle	27
2.2 Target Fabrication	29
2.3 Interaction of charged particle with matter	33
2.4 Electronics for processing of signals and Data Acquisition	35
2.5 Theoretical models for nuclear reactions	36
2.5.1 Optical Model and Optical Potential	36
2.5.1.1 Wood Saxon Potential	37
2.5.1.2 Sao Paulo Potential (SPP)	38
2.5.2 Microscopic Double Folding Model	40

2.5.3 Dispersion Relation Calculation	42
2.5.4 Coupled Channel Calculation	45
2.5.4.1 CRC	45
2.5.4.2 CDCC	47
References	50
<b>Chapter 3: Elastic scattering for <math>{}^6\text{Li}+{}^{51}\text{V}</math> and systematic study of breakup threshold Anomaly</b>	<b>52</b>
3.1 Introduction	52
3.2 Experimental setup	53
3.3 Experimental and Theoretical Analysis	56
3.3.1 Optical Model Analysis	57
3.3.2 Microscopic Double Folding model analysis	61
3.3.3 Dispersion Calculation	61
3.3.4 CDCC Analysis	62
3.4 Systematic studies	66
3.4.1 Systematics of Dispersion Calculation	66
3.4.2 Systematics of Reaction Cross-Section	66
3.5 Summary and Conclusion	70
Reference	71
<b>Chapter 4: Inclusive Alpha production for <math>{}^6\text{Li}+{}^{51}\text{V}</math> system</b>	<b>75</b>
4.1 Introduction	75
4.2 Experimental details	76
4.3 Experimental Energy and Angular Distribution Spectra	78
4.4 Theoretical analysis	80
4.4.1 Statistical Model Calculation	80

4.4.2 CDCC Calculations	80
4.4.3 CRC Calculations	82
4.4.3.1 1-n transfer	83
4.4.3.2 1-p transfer	83
4.4.3.3 d-cluster transfer	84
4.5 Systematic studies	89
4.6 Summary and Conclusion	92
Reference	93
<b>Chapter 5: Exploring Breakup Coupling Effect in <math>{}^7\text{Li}+{}^{92,100}\text{Mo}</math> Elastic Scattering around Coulomb Barrier Energies</b>	<b>96</b>
5.1 Introduction	96
5.2 Experimental setup	97
5.3 Experimental and Theoretical analysis	98
5.3.1 Optical Model Analysis	102
5.3.1.1 Wood-Saxon Potential (WSP) model analysis	102
5.3.1.2 São-Paulo Potential (SPP) model analysis	103
5.3.2 Dispersion Calculation	108
5.3.3 CDCC Analysis	111
5.4 Comparative studies of fusion and total reaction cross section	115
5.5 Summary and Conclusion	119
Reference	120
<b>Chapter 6: Study of Breakup Effect of Weakly Bound Projectile around Coulomb Barrier Energies for <math>{}^6\text{Li}+{}^{100}\text{Mo}</math> System</b>	<b>124</b>
6.1 Introduction	124

6.2 Experimental setup	126
6.3 Experimental and Theoretical analysis	128
6.3.1 Optical Model Analysis	128
6.3.1.1 Wood-Saxon Potential (WSP) model analysis	128
6.3.2 Dispersion Calculation	133
6.4 Summary and Conclusion	135
Reference	135
 <b>Chapter 7: Summary, Conclusions, and Future Outlooks</b>	 <b>137</b>
7.1 Summary, Conclusions	137
7.1.1 Elastic scattering for ${}^6\text{Li}+{}^{51}\text{V}$ and systematic study of breakup threshold Anomaly	137
7.1.2 Inclusive Alpha production for ${}^6\text{Li}+{}^{51}\text{V}$ system	138
7.1.3 Exploring Breakup Coupling Effect in ${}^7\text{Li}+{}^{92,100}\text{Mo}$ Elastic   Scattering Around Coulomb Barrier Energies	140
7.1.4 Study of Breakup Effect of Weakly Bound Projectile around Coulomb Barrier Energies for ${}^6\text{Li}+{}^{100}\text{Mo}$ System	141
7.2 Future outlooks	141
