

# ACKNOWLEDGEMENTS

This thesis would not have been possible without a great many people who have helped me through the duration of my PhD. Firstly, I am enormously grateful to my industrial supervisor, Dr. Rajesh Bahekar. Under his tutelage, guidance, and encouragement, I have grown into a more careful and thorough scientist and a more confident person. He sets a shining example of scientific rigor. I am thankful to have trained under such a kind and caring research supervisor. I am also highly thankful to my academic supervisor, Prof. Shubhangi Soman, for her outstanding support and backing throughout the process and for taking the time and effort to give me sound scientific advice that has shaped my thesis.

I am grateful to Zydus Research Centre's management personnel, Shri. Pankaj Patel, Dr Mukul Jain, Dr Rajiv Sharma, Dr Ranjit Desai, Dr Kumaragurubaran Nagaswamy, and Mr. Ashish Gupte, for their encouragement and giving me great opportunities to enrol in a PhD program.

I would like to thank Prof. Ashutosh Bedekar, Offg. Head, and Prof. Neelima Kulkarni, Prof. Anjali Patel, and Prof. Shailesh Shah, former heads of the Department of Chemistry at the M.S. University of Baroda, for their administrative support.

A huge thanks to all my chemistry lab colleagues, past and present: Pradip Jadav, Amitgiri Goswami, Dipam Patel, Vijay Prajapati, Jignesh Pethani, Hardik Shah, Bhushan Dave, Rajendra Chopade, Harsh Desai, Kamal Dave and Rashmi Ramdhare. Thanks for all the help, motivation, and fun; it's been great working with you all.

I would like to acknowledge Rina Soni, Gautam Patel, Santosh Sasane, Suresh Pola, and Nandini Panchal for supporting me throughout my PhD study.

Thank you to the chemical analysis team at ZRC, especially Jigar Gajjar, Jay Purani, Prashant Kapse, Harshal Shah, Nayanish Trivedi, Amit Patel, Prakash Davadra, and Kailash Asati, for providing ESI-MS, UPLC, NMR, and other analytical data.

I would also like to acknowledge my cell biology and pharmacology lab colleagues, in particular Hoshang Patel, Manoranjan Sharma, Ankit Patel, Krishnarup Ghoshdastidar, Debdutta Bandyopadhyay, Abhijit Chatterjee, and Jogeswar Mahapatra, for assistance in generating the biological data presented in this thesis.

I thank Poonam Giri Goswami, Rajesh Sundar, and Jitendra Patel for conducting animal experiments. I am thankful to Jeevankumar Jamili and S. Sachchidanand for their help in molecular modelling studies. I also would like to thank Kaushik Banerjee for all the support and encouragement.

Finally, I give my deepest gratitude to my parents, Ashvinbhai and Ramilaben, who have given me everything I have. Thanks, my brother Harish, for being so supportive. A massive thank you to my absolute better half, Bina, and my son, Kathan; none of this would have ever been possible without your unconditional support and encouragement. Thank you for brightening my life.

**Joshi Darshankumar Ashvinbhai**
