|                                                                                    | Page Number |
|------------------------------------------------------------------------------------|-------------|
| <b>Summary</b>                                                                     | 1-15        |
| <b>Chapter 1. General Introduction.</b>                                            | 16-25       |
| <b>Chapter 2. Regioselective Cyclodehydration of Aryloxyketones to Benzofuran.</b> |             |
| 2.1 Introduction                                                                   | 27          |
| 2.2 Results and Discussion                                                         | 34          |
| 2.3 Experimental                                                                   | 54          |
| 2.4 Conclusion                                                                     | 61          |
| 2.5 References                                                                     | 62          |
| <b>Chapter 3. Section A: Synthesis of Furoflavones.</b>                            |             |
| 3.A.1 Introduction                                                                 | 65          |
| 3.A.2 Results and Discussion                                                       | 67          |
| 3.A.3 Experimental                                                                 | 106         |
| 3.A.4 Conclusion                                                                   | 126         |
| 3.A.5 References                                                                   | 127         |
| <b>Section B: Conformation of Furoflavanones.</b>                                  |             |
| 3.B.1 Introduction                                                                 | 130         |
| 3.B.2 Results and Discussion                                                       | 131         |
| 3.B.3 Experimental                                                                 | 141         |
| 3.B.4 Conclusion                                                                   | 141         |
| 3.B.5 References                                                                   | 142         |
| <b>Chapter 4. Studies in Synthesis of New Psoralenamines.</b>                      |             |
| 4.1 Introduction                                                                   | 144         |
| 4.2 Results and Discussion                                                         | 145         |
| 4.3 Experimental                                                                   | 173         |

|     |            |     |
|-----|------------|-----|
| 4.4 | Conclusion | 181 |
| 4.5 | References | 182 |

**Chapter 5. Section A: Heterocycles from 4-Hydroxy Coumarin.**

|       |                        |     |
|-------|------------------------|-----|
| 5.A.1 | Introduction           | 185 |
| 5.A.2 | Results and Discussion | 186 |
| 5.A.3 | Experimental           | 218 |
| 5.A.4 | Conclusion             | 225 |
| 5.A.5 | References             | 226 |

**Section B: Studies in the Synthesis and Tautomerism of New Warfarins.**

|       |                        |     |
|-------|------------------------|-----|
| 5.B.1 | Introduction           | 228 |
| 5.B.2 | Results and Discussion | 231 |
| 5.B.3 | Experimental           | 250 |
| 5.B.4 | Conclusion             | 255 |
| 5.B.5 | References             | 256 |

**Section C: Synthesis of New Warfarins via Hetero-Diels-Alder Cycloaddition.**

|       |                        |     |
|-------|------------------------|-----|
| 5.C.1 | Introduction           | 258 |
| 5.C.2 | Results and Discussion | 261 |
| 5.C.3 | Experimental           | 285 |
| 5.C.4 | Conclusion             | 289 |
| 5.C.5 | References             | 290 |
