

# List of Figures

1.1	Schematic diagram of fission process	9
1.2	Potential energy diagram showing the double-humped fission barrier . . . . .	10
1.3	Fission yield as a function of mass number for thermal and 14 MeV neutron-induced fission of $^{235}\text{U}$ .....	12
2.1	A schematic arrangement of the AHWR [1].....	34
2.2	A Schematic diagram of ADS.....	37
2.3	A Schematic diagram of ADS for transmutations.....	38
3.1	The rolling mill at Target lab, BARC-TIFR Pelletron Facility, Mumbai.....	46
3.2	A schematic diagram BARC-TIFR Pelletron Facility.....	48
3.3	Yields of fission products (%) as a function of mass number in the neutron-induced fission of $^{232}\text{Th}$ at average energy of 5.42 MeV along with the literature data.....	55
3.4	Yields of fission products (%) as a function of mass number in the neutron-induced fission of $^{232}\text{Th}$ at average energy of 7.75 MeV along with the literature data.....	56
4.1	A Schamatic diagram of Th-U fuel cycle.....	61
4.2	Six meter Proton Beam Irradiation set-up at BARC-TIFR Pelletron, Mumbai.....	65
4.3	Schematic diagram showing the arrangements used for neutron irradiation.....	68
4.4	High Purity Germanium (HPGe) Detector at RCD lab, TIFR, Mumbai.....	69
4.5	Gamma ray spectrum of irradiated $^{232}\text{Th}$ showing the $\gamma$ -ray energy of $^{233}\text{Pa}$ .....	71
4.6	Gamma ray spectrum of irradiated $^{232}\text{Th}$ showing the $\gamma$ -ray energy of $^{231}\text{Th}$ .....	72
4.7	Neutron spectrum from $^7\text{Li}(p,n)$ reaction irradiated with proton energy of 5.6 MeV	

	calculated using EMPIRE computer code.....	76
4.8	Neutron spectrum from ${}^7\text{Li}(\text{p},\text{n})$ reaction irradiated with proton energy of 12 MeV calculated using EMPIRE computer code.....	77
4.9	Neutron spectrum from ${}^7\text{Li}(\text{p},\text{n})$ reaction at $E_p=5.6$ MeV calculated using the results of Meadows and Smith [55].....	79
4.10	Extrapolated neutron spectrum in ${}^7\text{Li}(\text{p},\text{n})$ reaction at $E_p=12$ MeV obtained from neutron spectrum at $E_p=10$ MeV of C. H. Poppe et al. [60].....	80
4.11	Neutron spectrum from ${}^7\text{Li}(\text{p}, \text{n})$ reaction at $E_p=7.8$ MeV calculated using the results C. H. Poppe et al. [60].....	81
4.12	Neutron spectrum from ${}^7\text{Li}(\text{p}, \text{n})$ reaction at $E_p=18$ MeV calculated using the results of C. H. Poppe et al. [60].....	82
4.13	Gamma ray spectrum of separated ${}^{233}\text{Pa}$ from neutron irradiated ${}^{232}\text{Th}$ .....	86
4.14	Plot of experimental and evaluated ${}^{232}\text{Th}(\text{n}, \gamma)$ reaction cross-section as a function of neutron energy from 1 keV to 14 MeV. Experimental values from present work and from ref. [21-37] are in different symbols, whereas the evaluated and theoretical values from TALYS are in solid line of different colors.....	97
4.15	Plot of experimental and evaluated ${}^{232}\text{Th}(\text{n}, 2\text{n})$ reaction cross-section as a function of neutron energy from neutron energy 5 MeV to 20 MeV. Experimental values from present work and from refs. [38-46] are in different symbols, whereas the evaluated and theoretical values from TALYS are in solid lines with different colors.....	98
5.1	A schematic diagram of ${}^{233}\text{U}$ production from ${}^{232}\text{Th}$ .....	108
5.2	Gamma-ray spectrum of radiochemically separated ${}^{233}\text{Pa}$ showing seven different	

	$\gamma$ - rays with their branching intensities with x-axis as Channel numbers.....	112
5.3	Gamma-ray spectrum of radiochemically separated $^{233}\text{Pa}$ showing seven different $\gamma$ - rays with their branching intensities with x-axis as Energy (keV).....	113
5.4	Radioactive decay of the $^{233}\text{Pa}$ as a function of time.....	114
5.5	Fission tracks of ca. 15 $\mu\text{m}$ size with elliptical shapes from $^{233}\text{Pa}(2n_{\text{th}}, f)$ , recorded and developed on the Lexan detector with 500x magnification. Figs. 5a and 5b correspond to different areas of the same slide and the image was taken with different microscopes using the same magnification. The size of the magnified view of the track area of the lexan detector shown in (a) and (b) are 0.00159 $\text{cm}^2$ .....	117
5.6	Plot of experimental and theoretically $^{234}\text{Pa}(n, f)$ cross-section. Theoretical fission sections above 1 keV were calculated using the TALYS computer code version 1.2. The fission cross-section below 1 keV up to thermal energy was extrapolated by a normalized fit of the $1/v$ formula as shown in the figure.....	121
5.7	Plot of experimental and theoretically $^{242}\text{Am}(n, f)$ cross-section. Theoretical fission cross - sections above 1 keV were calculated using the TALYS computer code version 1.2. The fission cross-section below 1 keV up to thermal energy was extrapolated by a normalized fit of the $1/v$ formula as shown in the figure.....	122
6.1	Typical $\gamma$ -ray spectrum of irradiated natural Zr metal at thermal neutron energy in APSARA reactor showing the $\gamma$ -ray energy of $^{95}\text{Zr}$ and $^{97}\text{Zr}$ .....	130
6.2	Photograph of Purnima Neutron Generator (300 KV DC electrostatic accelerator) at Bhabha Atomic Research Centre (B.A.R.C.), Mumbai.....	132

6.3	Schematic diagram showing the arrangement used for neutron irradiation.....	134
6.4	Plot of experimental and evaluated $^{94}\text{Zr}(n,\gamma)^{95}\text{Zr}$ reaction cross-section as a function of neutron energy 1 MeV to 15 MeV. Experimental values from the present work and from ref.29 are in different symbols and colors, whereas the evaluated values from TENDL 2010 is in black solid line.....	140
6.5	Plot of experimental and evaluated $^{90}\text{Zr}(n,\gamma)^{90}\text{Y}^{\text{m}}$ reaction cross-section as a function of neutron energy 2 MeV to 20 MeV. Experimental values from the present work and from ref. (30, 31) are in different symbols and colors, whereas the evaluated values from TENDL 2010 are in black solid line.....	141
7.1	A schematic of regional IAEA-NDS nuclear data mirror site set-up in India.....	147
7.2	Creation of EXFOR files using EXFOR-Editor.....	152
7.3	$^{56}\text{Fe}(n,p)$ cross-section experimental data with ENDF/B-VI evaluation.....	153
