

ACKNOWLEDGEMENTS

The author would like to express his deep sense of gratitude first, to the authorities of the American PL 480 Funds in India for the award of the Research Project FG-In-245 to Professor C.V. Ramakrishnan under which scheme the author was appointed as a Research Assistant.

His sincere thanks are next due to Professor C.V. Ramakrishnan for the author's appointment, and also for his able guidance in the prosecution of the Research Project.

The author is indebted to Dr. S.V. Ganapati, Principal Investigator of the project for his day to day guidance throughout the course of the Research Scheme; and for his critical review of the manuscript; to Dr. Prabhakar Ambedkar, Lecturer in Zoology, M.S. University of Baroda for invaluable assistance in the identification of protozoans; to Dr. (Mrs.) Indira S. Jayangoudar, Senior Scientific Assistant in the Ahmedabad Field Centre of the Central Public Health Engineering Research Institute for help in the identification of the algal flora; to Dr. C.R. Curds for supplying a micro-film copy of his original thesis entitled : "Studies in the Ecology of Ciliated Protozoa in Activated Sludge and Their Role in the Process of Sewage Purification;" to Dr. T.B.S. Prakasam for supplying an original copy of the Ph.D. thesis : "Enumeration, Characterisation and Adaptation of Aerobic Heterotrophic Bacterial Population of Activated Sludges"; to Dr. G.J. Mohan Rao, Asst. Director, Central Public Health Engineering Research Institute, for his Sc.D. thesis under the title : "Activated Sludge Metabolism of Certain Quaternary Carbon Compounds"; to Dr. Meera Bai for her Ph.D. thesis entitled : "Studies on the Mechanism of Sewage Purification"; to Director R.D. Van Zuillen for a printed copy of Dr. Ir. H.W. Van Gil's Ph.D. thesis entitled : "Bacteriology of Activated Sludge" ; to

Professor J.V. Bhat of the Indian Institute of Science, Bangalore for loaning Dr.F.F.Dias' Ph.D. thesis entitled : "Studies on the Bacterial Flora of Sewage."

To Mr.Barry Friedman, Research Assistant, Water Resources Centre, Engineering Experiment Station, The Ohio University, Ohio, for sending some of his Zoogloea cultures in exchange for the author's and to Dr.Koby Crabtree, Department of Civil Engineering of the University of Wisconsin for sending his type culture of Zoogloea ramigera for comparison; to Dr.S.C. Pillai for valuable discussion, and to Professor N.C.Dondero of Cornell University for sending certain fine Chemicals, and to the authorities of the Baroda Municipal Corporation for permitting him to take samples of sewage.

Lastly, the author will be failing in his duty if he did not mention the help rendered by the Hon.Editor, Institute of Water Pollution Control (formerly the Institute of Sewage Purification, England) in permitting the author to reproduce the drawings of vorticellids and other protozoans in the paper entitled : " Some Microbiological Aspects of Sewage Purification" by A.N.Barker on pages 7-22 of the 1949 issue of the Journal and Proceedings of the Institute; by Dr.G.W.Prescott, President, Transactions of the American Microscopical Society by permitting him to reproduce some of the drawings of vorticellids from volume 50 of the 1931 transactions; and by Professor Peter C.G. Isaac of the King's College, Newcastle, England for permitting him to reproduce some drawings of protozoans that were published on page 59 of his 1960 book entitled : Waste Treatment.
