

ACKNOWLEDGEMENT

I am in duty bound to record my deep sense of gratitude to Dr. J. C. George for the suggestion of the problem, and also for the constant guidance and encouragement, but for which this work would not have been successfully completed.

I am thankful to Dr. Suresh Sethna, Professor of Chemistry, for his kind co-operation in lending me some chemicals for my analytical work.

My thanks are also due to Mr. Y. K. Sane for his valuable help in taking some of the photographs presented.
