

ACKNOWLEDGEMENTS

I have great pleasure in recording my deep sense of indebtedness to Dr. J. C. George, Professor and Head, Department of Zoology, M. S. University of Baroda, whose invaluable guidance, keen interest and constant encouragement have been a source of inspiration to me throughout this work.

I am grateful to Dr. A. R. Gopal-Iyengar, Director, Biology Group, Atomic Energy Est., Trombay, for extending the facilities of the Biology Division for carrying out the work on irradiation. To Dr. K. K. Nair of the Biology Division, I am beholden for his keen interest and valuable advice in conducting the studies on the effects of gamma radiation.

It is a pleasure to thank my friends and colleagues in the Departments of Zoology and Statistics who have helped me in various ways in the course of this work.

The present work was supported by the award of a Research Scholarship from the Ministry of Education, Government of India.
