

Dedicated to My Father
for Letting Me Be...

Acknowledgements

“True knowledge exists in knowing that you know nothing.”

- Socrates

It has been quite a journey with lots of ups and downs for me. It is true when people say it takes an entire village to complete a PhD. I am eternally grateful to each one who has been part of this incredible roller coaster ride.

Dr. Rajesh Patkar, my PhD supervisor, not only for his guidance and teaching me the way of doing science, but how he always stayed at our side in the difficult times. I am indebted for his unwavering support throughout my journey. His zeal for science, especially, the expertise in fungal pathobiology has inspired me to take up a few exciting projects, because of which, I learned about the functional genomics aspects. Owing to the countless lab meetings and ongoing emphasis on soft skills development, it has tremendously helped me develop confidence in public speaking and scientific writing.

Late Prof. Bharat Chattoo, my former PhD guide, for providing us a legacy, to own the research project and providing the excellent infrastructure at Genome Research Centre.

Late Dr. Johannes Manjrekar, my former PhD guide, for his worldly wisdom and love for the nature, apart from his extraordinary bird's-eye view on science. He always encouraged us to pursue a hobby to keep the sanity in check.

Dr. Jérôme Collemare (Westerdijk Fungal Biodiversity Institute, The Netherlands), for showing confidence in my research project and providing me an opportunity to work under EMBO Scientific Exchange Grant. His expertise in fungal secondary metabolites and comparative genomics has significantly helped achieve my research goals.

Dr. Jorge Navarro (Wageningen University & Research, The Netherlands), for his expertise in similarity network analysis and bioinformatics.

Dr. Malali Gowda (TransDisciplinary University, Bengaluru) taught me the mono-conidial isolation technique and for providing a few blast disease infected plant tissues.

Dr. T. R. Sharma (ICAR, New Delhi), for his kind gift in the form of eight field strains of the blast fungus.

Dr. Aswin Sai Narain Seshasayee (NCBS, Bengaluru) allowed me to take a short training in his lab, where I learned the important lesson on how to do bioinformatics.

European Molecular Biology Organization (EMBO) for awarding me the EMBO - Scientific Exchange Grant for the research visit at Westerdijk Fungal Biodiversity Institute, The Netherlands.

The Maharaja Sayajirao University granted the intramural University Research Scholarship.

Department of Biotechnology (DBT), GOI for funding the whole genome sequencing of Indian field strains of the blast fungus, as a part of a project grant.

Prof. G. Archana, the HoD, for the valuable scientific suggestions, extending help in administrative support, most importantly, understanding the fragility of the certain difficult situations during my PhD.

Prof. D. Gajjar, Biotech coordinator, for her constant encouragement and kindness during my later stage of the PhD.

My doctoral committee members and all the faculty members of the department, Prof. M. Nair, Prof. A. Nerurkar, Prof. S. Ingle, Dr. Nandita Baxi and Dr. Pranav Vyas for their valuable and insightful suggestions.

My colleagues at GRC have been wonderful companions throughout this long voyage, which began with a flourishing and large research team at one point to a much smaller group at a later stage. It used to be a lot of fun being part of the long conversations over tea and partying on food munchies with lab mates. It was a rewarding experience working at GRC, our second home, where I learnt the basics of the lab maintenance, which seems trivial but quite challenging, as well as troubleshooting the experiments, instruments and so on.

Akhil for teaching me the importance of a thorough discussion and planning before performing the experiments,
Sayali and Anand for helping me during the crucial times at the later stage of my PhD,
Divya for his determination and philosophical conversations,
Abhijit, Parth, Chandan, Pratiti and Oluwabusola for creating the lovely memories during our little overlap,
Hiral and Hashim for their friendship and mentoring with the patience during initial phase,
Priya Jishnu for the constant encouragement.

I fondly remember the former members of GRC, Varsha, Sushma, Vikas, Chandra Prakash, Suhail, Venkat Laxmi, Pinal Chandrana, Harsukh Tank.
Argha, Payal, Ankur, Achal, Gaganjyot, Shivani, Aditya and Pinku, Dissertation students, for their enthusiasm and making the lab environment cheerful.

Hasmat, Namrata, Ruchi Sharma and Jaswandi, my colleagues outside GRC, for the moral support and willingness to listen to my emotions over the years.

Anjali, Soumya and Shruti, my lifelong friends, for teaching me the virtue of persistence, understanding me, and dealing with my inconsistency in maintaining communications.

Niralee, Swati, Siddhi, Ashtaad, Abhik, Gosai, Pinal and Suraj, my former and present colleagues at the department, for their friendly faces and memorable experiences.

Department and university administrative staff Mr. Nitish Bhatt, Mr. Shirish Nagarkar, Mr. Jayakumar Nair, Mr. Arunswillu Varghese for helping me with all the paperwork and administrative support.

Lab helpers Girish bhai and Mukesh bhai for helping with the making the labs clean.

I can't thank enough my family for their selfless love and kindness towards me. This journey would not have been possible without their immense support.

Kashmira and Natvarlal, my parents, for teaching me to be ambitious while remaining grounded.

Vandana and Bhupendra, my in-laws, for believing in my aspirations, offering the consistent help, and remaining patient over these many years.

Karna, my beloved husband, who is truly the wind beneath my wings. I am forever indebted to him for not letting me quit. His positive outlook on life and joyous attitude has shaped me into the person I am today.

My loving brother Pradip, sister Richa, and adorable nieces Shubhangi and Neelakshi, for keeping me sane with their love and joy.

Lastly, to the God Almighty, for blessings and filling me with the strength to fulfill my dreams.

Thank You!

Khyati Mehta
