

ACKNOWLEDGMENTS

I wish to record my gratitude to Dr. P.M. Bhargava, M.Sc., Ph.D., for his guidance and encouragement throughout this investigation.

I am indebted to Dr. S. Gurnani for her constant help, constructive suggestions and advice during this work. I specially thank Dr. M.S. Narasinga Rao for valuable discussions and help during the preparation of the thesis. My sincere thanks are also due to my Professor, Dr. C.V. Ramakrishnan, for his interest in the work. I acknowledge gratefully the cooperation of my colleagues in the Biochemistry Section and express my sincere thanks to Mr. Pramod for help in experiments with the Analytical Ultracentrifuge. I wish to thank Dr. G.S. Sidhu for his interest in the work.

This investigation was completed during the tenure of a Junior Research Fellowship awarded by the Council of Scientific and Industrial Research, New Delhi, which is gratefully acknowledged.
