

ACKNOWLEDGEMENTS

Many people and institutions have been provided immense support during the pursuit of my Ph.D. research. I would like to acknowledge their contributions. First and foremost, I would like to thank my guide and mentor, Dr. Maitree Vaidya for her constant guidance and advice and most importantly for allowing me to grow as a researcher. Without her guidance, cooperation and support, I would have been unable to analyze and understand the data collected. Her constant support and encouragement motivated me to undertake such a research and made possible its timely completion. Also, I would like to thank the Head of the Department, Prof. Aruna Awasthi for being my teacher ever since I began my Graduation studies in 2010. Prof. Aruna Awasthi, beside acting as my teacher was kind enough to initiate me into the field of research. She provided me with opportunities by appointing me as Project Fellow and Research Assistant. I am grateful to her for meticulous and sincere support and unfailing encouragement and inspiration which helped me to reach my full of potential in academic and research.
