ACKNOWLEDGEMENT

A shower of gratitude from bottom of my heart on my teacher-guide Dr. Mario Xavier. When I registered for this reasearch, I was a mere student. However during the journey of research he morphed into a very dear friend-philosopher-guide to whom I owe this thesis from cover to cover ! Ofcourse errors are mine, creative and rational sparks have been nourished by him.

I am overwhelmed by the feelings of thankfulness to my family members and to my research participants ! Only way I could think of expressing the same is to dedicate this research to them.

My heart-felt thanks to Mr. Someshwar Ms. Himani and Mr. Minesh Bhatt have been a great computational help without whom there would have been no program for any of the experiment. My special thanks to dear friends Dr. Shagufta and Dr. Renu for their continued support, editorial assistance and long, patient discussion of the research !

Ofcourse, I could not be less grateful to the library staff of Hansa Mehta Library and my teaching and non-teaching collegues who have been always after me, pushing me on the brink of deadline ! I am sure this thesis is a delight to them.

Honestly, as I think of who all have contributed knowingly or unknowingly to this research my acknowledgement and memoirs fuse into a whole serial of my life span and I fail to pinpoint any one, nay, I might miss out somebody ! I owe my complete development to those innumerable people who have played a significant role in my rationality. I cherish your unnamed contribution !!
