

LIST OF TABLES

Sr.No.	Title	Page No.
2.1	Items on Masculinity, Femininity and Social Desirability Scales of the Bem's Sex-Role Inventory	45
2.2	The modified adjective checklist used for the present study	46
2.3	Description of the tools used for the study	47
3.1	Mean differences, S.D. and 't' score of male & female leaders on perception of leadership effectiveness.	54
3.2	Mean differences, S.D. and 't' score of male and female employees on downward influence tactics.	55
3.3	Mean, S.D. and F ratio of male and female employees on perception of organizational health dimensions.	56
3.4	Mean, S.D. and F ratio of male and female employees on perception of leadership effectiveness.	57
3.5	Mean, S.D. and F ratio of male and female employees on perceived use of downward influence tactics.	58
3.6	Multiple comparison of means of organizational sectors on perception of organizational health dimensions from Tukey's post-hoc.	59
3.7	Multiple comparison of means of organizational sectors on perceived leadership effectiveness from Tukey's post-hoc.	63
3.8	Multiple comparison of means of organizational sectors on perceived use of downward influence tactics from Tukey's post-hoc.	65
3.9	Interaction effects of gender of the employee and the organizational sectors on perception of organizational health dimensions.	68
3.10	Interaction effect of gender of the employee and the organizational sectors on perception of leadership effectiveness dimensions.	70

Sr.No.	Title	Page No.
3.11	Interaction effect of gender of the employee and the organizational sectors on perceived use of downward influence tactics by the leaders.	71
3.12	Mean, S.D. and F ratio of leaders across different age groups on their perceived leadership effectiveness by employee respondents.	72
3.13	Mean, S.D. and F ratio of leaders across different age groups on their perceived use of downward influence tactics by employee respondents.	73
3.14	Mean, S.D. and F ratio of years of work experience of leaders on perception of leadership effectiveness.	75
3.15	Mean, S.D. and F ratio of years of work experience of leaders on perceived use of downward influence tactics.	76
3.16	Interaction effect of age and years of work experience of leaders on perception of leadership effectiveness.	80
3.17	Interaction effect of age and years of work experience of the leader on perception of leaders' use of downward influence tactics.	86
3.18	Interaction effects of gender of the leader and gender of the employees on perceived use of downward influence tactics.	87
3.19	Interaction effects of gender of the leader and the organizational sectors in perception of leadership effectiveness dimensions	89
3.20	Interaction effects of gender of the leader and the organizational sectors on perception of downward influence tactics.	91
3.21	Mean differences, S.D. values and 't' score of high and low effective leader on perceived use of downward influence tactics.	93

Sr.No.	Title	Page No.
3.22	Inter-correlation between dimensions of perceived organizational health and leadership effectiveness.	97
3.23	Inter-correlation between dimensions of perceived organizational health and downward influence tactics.	101
3.24	Inter-correlation between dimensions of leadership effectiveness and downward influence tactics.	105
3.25	Regression analysis for leadership effectiveness predicting goal focus dimension of organizational health.	107
3.26	Regression analysis for leadership effectiveness predicting communication adequacy dimension of organizational health.	108
3.27	Regression analysis for leadership effectiveness predicting optimal power equalization dimension of organizational health.	109
3.28	Regression analysis for leadership effectiveness predicting resource utilization dimension of organizational health.	110
3.29	Regression analysis for leadership effectiveness predicting cohesiveness dimension of organizational health.	111
3.30	Regression analysis for leadership effectiveness predicting morale dimension of organizational health.	112
3.31	Regression analysis for leadership effectiveness predicting innovativeness dimension of organizational health.	112
3.32	Regression analysis for leadership effectiveness predicting autonomy dimension of organizational health.	113
3.33	Regression analysis for leadership effectiveness predicting adaptation dimension of organizational health.	114
3.34	Regression analysis for leadership effectiveness predicting problem solving adequacy dimension of organizational health.	114
3.35	Regression analysis for downward influence tactics predicting interpersonal relations dimension of leadership effectiveness.	116

Sr.No.	Title	Page No.
3.36	Regression analysis for downward influence tactics predicting intellectual operations dimension of leadership effectiveness.	117
3.37	Regression analysis for downward influence tactics predicting behavioural and emotional stability dimension of leadership effectiveness.	118
3.38	Regression analysis for downward influence tactics predicting ethical and moral strength dimension of leadership effectiveness.	119
3.39	Regression analysis for downward influence tactics predicting adequacy of communication dimension of leadership effectiveness.	120
3.40	Regression analysis for downward influence tactics predicting operations as a citizen dimension of leadership effectiveness.	121
3.41	Regression analysis for downward influence tactics predicting goal focus dimension of organizational health.	122
3.42	Regression analysis for downward influence tactics predicting communication adequacy dimension of organizational health.	123
3.43	Regression analysis for downward influence tactics predicting optimal power equalization dimension of organizational health.	124
3.44	Regression analysis for downward influence tactics predicting resource utilization dimension of organizational health.	125
3.45	Regression analysis for downward influence tactics predicting cohesiveness dimension of organizational health.	126
3.46	Regression analysis for downward influence tactics predicting morale dimension of organizational health.	127
3.47	Regression analysis for downward influence tactics predicting innovativeness dimension of organizational health.	128

Sr.No.	Title	Page No.
3.48	Regression analysis for downward influence tactics predicting autonomy dimension of organizational health.	129
3.49	Regression analysis for downward influence tactics predicting adaptation dimension of organizational health.	130
3.50	Regression analysis for downward influence tactics predicting problem solving adequacy dimension of organizational health.	131
3.51	Frequency of attributes chosen from list of 30 attributes to describe effective male leaders	133
3.52	Frequency of attributes chosen from list of 30 attributes to describe effective female leaders	135
3.53	Frequency and percentage of list of attributes selected by employee respondents across different organizations to describe an effective male leader.	137
3.54	Frequency and percentage of list of attributes selected by employee respondents across different organizations to describe an effective female leader.	140
3.55	The five most frequently selected attributes of effective male leaders by the employee respondents of the four organizational sectors.	143
3.56	The five most frequently chosen attributes of effective female leaders by male employees and female employees	145

LIST OF FIGURES

Sr. No.	Title	Page No.
1.1	Conceptual Model of the Study.	28
2.1	Organogram of the Corporate sector.	33
2.2	Organogram of the Education sector-Public	34
2.3	Organogram of the Education sector-Private	34
2.4	Organogram of the Development sector.	35
2.5	Organogram of the Law Enforcement sector.	36
2.6	Sector-wise break up of male and female employees.	37
2.7	Break up of work experience of employees in years.	38
2.8	Educational qualification of sample across organizational sectors	38
3.1	Mean scores of male and female employees on adaptation dimension across the four organizational sectors.	69
3.2	Mean scores on perception of interpersonal relations of leaders of different age groups and years of work experience.	81
3.3	Mean scores on perception of intellectual operations of leaders of different age groups and years of work experience.	82
3.4	Mean scores on behavioral and emotional stability of leaders of different age groups and years of work experience.	83
3.5	Mean scores of operations as a citizen of leaders of different age groups and years of work experience	84
3.6	Mean scores and interaction effect of gender of the leader and organizational sector on perception of behavioral and emotional stability dimension.	90
3.7	Dimensions of leadership effectiveness and organizational health.	107
3.8	Downward influence tactics and dimensions of leadership effectiveness.	115
3.9	Downward influence tactics and dimensions of organizational health.	122
4.1	Validation of the Conceptual Model of the study.	185
