On 4th May, 1974, the University Community received with profound sorrow the news that their Vice-Chancellor Justice Nusserwanji Kavasji Vakil had passed away in sleep. The sense of orphanage with which the stunned campus was suddenly assailed persists. The memory of his halcyon presence and his gracious ways quicken with of every new event in the University. We remember him as a man of unsparing devotion to this University, strong in his conviction of the essential unity and solidarity of the campus community, ever concerned to enhance its prestige as an academic institution and equally conscious of its responsibility to society. We are proud to continue in the traditions with which he so closely identified himself.

7. Important Event

Open Heart Surgery:

The S.S.G. Hospital with its base of close heart surgery was poised for an open heart surgery. It had all necessary equipments, talented surgeons and other ancillary staff. It needed take off. This was supplied by a team of cardial surgeons and the staff. It was a novel experiment in an indigenous team helping an institution of this country.

In close-heart surgery, without disturbing functioning of the heart, some cardial defects could be corrected; but complicated heart diseases cannot be undertaken, unless functioning of heart and lungs are bye-passed and carried on by mechanical pump and on oxygenation. This helps to perform heart surgery under direct vision and without haste.

Open heart surgery not only presided a highly technical medical and to the afflicted patients, but it helped the training of students in sophisticated surgery.

The inauguration of open cardial surgery placed the medical institution of Baroda on the country's map. It is the only institution of Gujarat and one among the few in the country.

CHAPTER XII(B)—SHETH UJAMSHI PITAMBERDAS AYURVEDIC RESEARCH UNIT

1. Functions of the Unit

Research in Ayurveda is the sole object of this Unit. The Unit has a Library, a Museum of Indian Medicinal Herbs and Minerals, a Clinical Laboratory, a Rasa-shala and an Out-Patient Department. Twenty beds are available for Ayurvedic Clinical Research and inpatient treatment.

2. Library

The total number of books is 2,632.

3. Museum

Fifty groups of available medicinal herbs, each group consisting of 10 drugs according to the pharmacological classification of Charak are arranged and maintained in the Museum. Specimens of minerals and other useful medicines have also been kept. A section of Ayurvedic Pharmacological medicine is also maintained. There are about 1,000 Ayurvedic specimens, 54 herbarium frames, 7 originals of Ayurved Photo frames, 75 specimen jars of fresh herbs preserved in solution, 16 charts and maps. About 300 specimens have been collected for the herbarium and are classified. A relief map of India showing the distribution of important medicinal plants in India is exhibited in the Museum.

Sixty-seven Ayurvedic herbs are maintained in the garden for fresh juices and quathas that are used in Pharmacy preparations and clinical trials.

CHAPTER XXX—STUDENT WELFARE ACTIVITIES**1. Halls of Residence**

The University being residential makes constant efforts to increase and improve residential accommodation for its students. At its start in 1949, the University had accommodation for 200 boys in rented buildings and another 200 boys in University owned buildings. There was no hostel accommodation for girl students. At the end of the year 1974-75, there were twelve Halls of Residence for boys and four Halls for girl students. One Hall for Post-graduate and research students with a capacity of 140 single seated rooms is under construction and is likely to be ready for occupation by June, 1975. The general policy of the University is to distribute students from various faculties in different Halls so that every Hall has students from different Faculties.

There is a good demand from students for residential accommodation in the University Halls of Residence. In order that the students may not be put to difficulties for searching accommodation in private houses in the city where the rents are exorbitant and facilities are comparatively too less, the University has to continue the procedure of admitting 3 students in most of the rooms this year also.

At the end of the year under report, 2,545 boys and 800 girls were in residence in different Halls as against 2,473 boys and 839 girls at the end of the previous year. A statement showing the break-up of these students by Halls and Institutions is given in Appendix XI.

In the Halls of Residence for boys there is one honorary Warden and in the girls' Hostel there is one paid full-time Superintendent to look after the residents. The administration of the Halls was carried on with the advice of the Advisory Committee of the Halls of Residence and Wardens' Committee.
